

XM Satelite Radio has been an outstanding product that I have subscribed to for several years. I cannot get the quality/quantity of radio broadcasts from standard radio. I travel out of state and enjoy the ability to stay on the same channel and get regional weather and news, without having to scan from channel to channel constantly...I was in the backcountry of Idaho hunting during the 9-11 attacks and was able to be keep informed with my XM Satelite, when we couldn't even get a AM station to come in, due to the remote area we were in....I respectfully urge the FCC to reject the NAB's petition 04-160 and I request the FCC to support XM ability to provide the kind of programming I feel I have a right to from XM Satelite...I am a Director of my police union and will inform my members of my objections to NAB's petiton 04-160....Thank you for time
